## FRONT END ENGINEER

---

IIT Delhi graduate and frontend developer with 2.5 years of experience specializing in Angular and React. Currently leading frontend development at Morgan Stanley (via Genpact).

## WORK EXPERIENCE

---

### Genpact, India

Aug 2022 - Present

#### Morgan Stanley | Front End Engineer

Jun 2023 - Present

- Led the front-end development of the Political Contribution Tracking System as the sole Angular developer, rapidly mastering the framework and delivering 200+ feature enhancements and bug fixes
- Engineered comprehensive data export functionality in Angular Grid by implementing back end integration, enabling bulk export of 20,000+ records simultaneously, improving from the previous page-wise limitation of ~100 records
- Transformed legacy desktop-only application into fully responsive platform using Bootstrap and Angular Material, optimizing UI across 3 breakpoints (mobile, tablet, desktop) and reducing user complaints by 80%
- Improved mobile UX by implementing carousel-based navigation for data-intensive tables, improving data accessibility for 2,000+ daily users with integrated page tracking

*Tech Stack: Angular, Angular Grid, TypeScript, Bootstrap, HTML, REST APIs*

### Jefferies | Front End Engineer

Aug 2022 - May 2023

- Collaborated in a 10-member team to maintain and enhance the Global Client Onboarding Platform for KYC processes
- Created an Additional Sanctions Screening interface with advanced search functionality
- Enhanced reporting system by synchronizing client, request, and PDF reports with main KYC form updates
- Resolved critical bugs in complex KYC forms and reports, improving system reliability and user experience

*Tech Stack: JavaScript, CSS, HTML*

## PERSONAL PROJECTS

---

### Foodie.com - Full Stack Food Delivery Platform

- Engineered a comprehensive food delivery platform with features including restaurant management, menu customization, and real-time order tracking
- Integrated secure payment processing using Stripe, established user authentication with Auth0, and deployed cloud-based image management via Cloudinary
- Developed an order management system with real-time status tracking and a responsive UI

*Tech Stack: React, Node, Express, MongoDB, Auth0, Stripe API, Cloudinary, REST APIs, TypeScript, Tailwind CSS*

### BuyBusy - E-commerce Web Application

- Built a feature-rich e-commerce platform with product filtering, search functionality, and cart management system
- Managed application state using Redux Toolkit and implemented user authentication with Firebase
- Crafted a responsive UI using Tailwind CSS, incorporating dark mode support and interactive notifications

*Tech Stack: React, Redux Toolkit, React Testing Library, Vitest, Firebase, REST APIs, TypeScript, Tailwind CSS*

## TECHNICAL SKILLS

---

**Languages:** HTML, CSS, JavaScript, TypeScript

**Frontend:** Angular, React, Redux, Redux toolkit, Tailwind CSS, Bootstrap, Material UI, Shadcn

**Backend & Tools:** Node.js, Express.js, MongoDB, Firebase, Auth0, Git, VS Code, npm, Data Structures & Algorithms

## EDUCATION

---

**Indian Institute of Technology, Delhi**

Bachelor of Technology in Mechanical Engineering

Delhi, India

Aug 2018 – Jul 2022
